

Factory Safety Lines

When putting down safety and marking lines in a warehouse or a manufacturing facility the lines have to be tough enough to survive the work environment. Epoxy and thermoplastic lines are as tough and permanent a line solution you can get in any facility. For a simpler short term marking solution; traffic marking paint may do the job.

We have all the tools and materials to properly diamond grind and shotblast your concrete in order to prepare it for your safety markings. Proper surface preparation is the most important step in making sure that your lines stand up to your work environment.

Features & Benefits:

- Clear indicators for safety walkways and traffic areas
- Photo illuminescient and antislip surface treatments
- Large range of Epoxy, Ultraviolet and Thermoplastic coatings solutions
- Range of colours, numbers and marking signage available

Left: Blue walkway with applied yellow safety lines in Sonoco manufacturing facility.
 Centre: Epoxy safety lines designating walkway areas in Exco facility.
 Right: FedEx warehouse yellow epoxy walkway safety and truck parking lines.
