

Self-Leveling Concrete

TTM Finishes offers certified and proven professionals to execute your self-leveling concrete projects. Self-Leveling Concrete underlayment is used to level uneven, grooved, and/or heavily pitted floors in order to make them stable, flat and suitable for installation of sheet vinyl, vinyl tile, ceramic tile, hardwood or carpet.

Self-Leveling Concrete overlays such as Ardex PCT Polished Concrete Topping are suitable as decorative final finished floors toppings and can be polished to a high gloss finish.

Features & Benefits:

- top quality products used to maximize your flooring investment
- guaranteed long term durability through proper floor preparation
- work performed by expert, fully-trained concrete applicators
- safe and clean work environment

- Left: 3/8" Polished Concrete Topping being poured on floor at North Face Store, Yorkdale location.
- Centre: Installation of 3/8" Polished Concrete Topping at the North Face Store, Yorkdale location.
- Right: Ardex K55 self-leveling underlayment being installed on floor at a depth from 1/16" to 3/16", at the new Intact Insurance Offices in Ajax.
